MEMORANDUM FOR THE RECORD

SUBJECT: Portable Desk Trays

STAT

[redacted] Physical Security Division, called today and reported that they had had 14 calls in the last 10 days to open jammed safe drawers. The jamming was caused by portable desk trays which apparently tipped as the drawer was being opened and the corners dug into the insulation on the roof of the compartment. I asked [redacted] if he had had any previous calls of this type and he said not as far as he knew. I told him that this appeared odd in that the trays had been in use for several months. I asked him if he would keep a continuous count on such calls so that we can determine the extent of the problem.
